

(Patent Pending)

Eye-D Cam

SPECIFICATIONS: A200-3-2

Attendant side

Visitor side

This system provides for an easy way to capture pictures of both the visitor and the driver's license that they present for identification.

Now your organization and the police can have accurate clean pictures of the visitor and the ID card that they present.

Whether your responsibility is for the care of people or property you have a way of adding positive identification of your customers and visitors.
